### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 29 January 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments filed 29 January 2007 have been fully considered but they are not persuasive.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the primary absorbent member of Poncy comprises both the absorbent core and the exterior layer. The finger indent is located at the withdrawal end of the absorbent member for facilitating the insertion of the tampon. Therefore, Poncy teaches providing a finger indent at the withdrawal end of the primary absorbent member of a tampon.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7, 10, 12-17, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Taylor et al. (6,258,075) in view of Poncy et al. (4,027,673).

Art Unit: 3761

With respect to claims 1 and 12, Taylor discloses all aspects of the claimed invention with the exception of the primary absorbent member comprising a finger indent. Taylor discloses a tampon 20, as shown in figure 1, comprising a primary absorbent member 21 having an insertion end 30, a withdrawal end 34, and an outer surface. The primary absorbent member 21 is compressed into shape, as disclosed in column 6, lines 12-14. A secondary absorbent member 60 is attached to the outer surface of the primary absorbent member 21 at the withdrawal end 34, as shown in figure 1.

Poncy discloses a tampon, as shown in figure 2, comprising a finger indent providing a space for the finger to be inserted in the tampon for easy insertion, as described in column 2, lines 47-59.

It would therefore be obvious to one of ordinary skill in the art at the time of invention to provide the primary absorbent member of Taylor with a finger indent, as taught by Poncy, to provide for easy insertion of the tampon.

With respect to claims 2 and 13, the secondary absorbent member 21 is sheet-like, as shown in figure 1.

With respect to claims 3 and 14, the secondary absorbent member 60 extends between 20 mm and 70 mm from the withdrawal end 43, as disclosed in column 9, lines 63-64.

With respect to claims 4 and 15, the secondary absorbent member 60 is not compressed, as disclosed in column 6, lines 7-9.

With respect to claims 6-7 and 16-17, the secondary absorbent member 60 can be either a single ply or comprise a first and a second ply, as disclosed in column 9, lines 52-58.

With respect to claims 10 and 20, a withdrawal member 48 is joined to the primary absorbent member 21, as shown in figure 1.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to C. Lynne Anderson whose telephone number is (571) 272-4932. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tanya Zalukaeva can be reached on (571) 272-1115. The fax phone
